(a) a MILP, min $c^\top z$
variables z
rows
(b) $\langle X \rangle$_0_100
leader x
follower y
follower
leader: first $\lceil n/2 \rceil$ variables;
every row at the follower
(c) $\langle X \rangle$_50_50
leader x
follower y
coupling
leader
follower
leader: first $\lceil n/2 \rceil$ variables
and first $\lceil m/2 \rceil$ rows
(d) MIPLIB 3: $\langle X \rangle$-$\langle k \rangle$
0.1
0.5
0.9
y
leader x
follower
follower: first $\lfloor kn \rfloor$ variables
($k = 0.1, 0.5, 0.9$) and every row
